Facility

Radkron Formulation's state-of-the-art facility integrates advanced equipment from leading manufacturers, showcasing our commitment to quality and efficiency. For tablet production, we utilize the 27 and 37 Station Compression machines from Karnavati, paired with the AF 90T automated capsule filling machine from ACG, to ensure precision and productivity. Coating processes are enhanced by Gansons' 48' Autocoater, while our granulation requirements are met with two lines from Sara Engineering. The facility also features 57 Air Handling Units from Edgetech and chillers from Bluestar, essential for maintaining optimal environmental conditions.

In packaging and filling operations, we employ an array of sophisticated machinery: a liquid filling machine from NPM, blister and Alu-Alu packing machines from Elmach, strip packing machines from Satellite Engineers, and ointment filling machines from PacMac. Our Building Management System, equipped with technology from ABB, Honeywell, Siemens, and Lenovo, ensures a controlled manufacturing environment. The laboratory is outfitted with precision instruments for rigorous pharmaceutical analysis, including HPLCs from Shimadzu, stability chambers from Thermolab, dissolution apparatus from Electrolab, and supporting equipment from LabIndia and PCI Analytics.
